

### 3.) Description on the proposal.

The intention of setting up a memorial (statue) of Sir Cliff Richard in front of Wembley Arena is because he is the artist who has had more concerts here, than any other artists – it deserve respect.

This will be the most natural place for a statue, to thank him for the music and because we think he deserve it.

The socle will be approximate 1.5 square meters, and 2 meters high.

For the socle to look right and consider with the commissions around the arena, a light edge around the socle will be properly for the environment, and for the architectural expression that exist outside the arena.

We believe it should be on the first step plateau, overlooking The Arena and The Walk of Fame, in front of him.

Attach a computer image to show how we think it will look like.

This is how we imagine the statue of Sir Cliff Richard at Wembley Arena. Facing the arena in familiar pose, with The Walk of Fame in front of him, where he`s handprints are.

He is the artist who has held most concerts here, of all other artists that has preformed here.

When the squere is filled with people,he will fall quite naturelly in to the crowd.

We will create a base of a 1.5 square meters with a stripe of light that fits into the lightning system around the arena.

The base will also have an engraved plate with Thank you for the music,from the fans worldwide.

This is how we think if should look like.
